Contact No: +91-123-1234567

Career Objective:

Accomplished Senior Ruby on Rails Developer with over 8 years of professional experience in designing and delivering high-quality web applications. Known for a logical and problem-solving approach to software development and expertise in system design, database optimization, and team leadership. Demonstrates a strong ability to understand business requirements and translate them into scalable and maintainable technical solutions.

Personal Skills:

- Confidence: Demonstrates self-assurance in decision-making and problem-solving.
- Team Collaboration: Thrives in collaborative environments, fostering teamwork and mutual respect.
- Analytical Thinking: Strong ability to break down complex problems and devise efficient solutions.
- Logical Reasoning: Adept at applying logical frameworks to solve intricate challenges.
- Presentation Skills: Effectively communicates technical concepts to diverse audiences.
- Written Communication: Produces clear and concise technical documentation and reports.
- Adaptability: Quickly adjusts to changing project requirements and technological trends.
- Problem Solving: Excels in identifying root causes and implementing effective solutions in high-pressure situations.

Professional Skills

- Languages & Frameworks: Ruby, Ruby on Rails (8+ Years), JavaScript, HTML5, CSS3, Turbo, Stimulus, TypeScript
- Front-End Technologies: jQuery, Bootstrap, Tailwind CSS, Webpacker
- Databases: PostgreSQL, MySQL
- APIs: RESTful services, GraphQL, API authentication (OAuth2, JWT), third-party API integration
- Background Jobs & Messaging: Sidekiq, Delayed Job, RabbitMQ, Redis, ActiveJob
- Deployment Tools: Docker, Kubernetes, Heroku CLI, Capistrano
- Testing Frameworks: RSpec, Capybara, Selenium, FactoryBot
- Version Control & CI/CD: Git, GitHub, GitLab, CircleCI, Jenkins
- Caching & Optimization: Redis, Memcached, Fragment Caching, Query Optimization, Eager Loading
- Security Practices: Secure Authentication, XSS/CSRF Prevention, SQL Injection Mitigation, Encrypted Attributes
- System Design: Expertise in designing scalable, maintainable, and efficient systems for high-traffic applications
- Agile and Scrum: Extensive experience working in Agile teams and following Scrum methodologies
- Other: Familiar with tools like RVM, Bundler, Yarn; Strong knowledge of SDLC processes

Educational Qualifications:

- Master of Computer Applications (MCA), Maharaja Ranjit Singh College of Professional Studies (Indore) with a 7.4 CGPA. In 2016
- Bachelor of Computer Applications (BCA), Devi Ahilya Vishwavidyalaya (Indore) with 66.33%.

In 2014

- HSC Examination from M.P. Board With 74%
- HSSC Examination from M.P. Board with 59%

Hobbies:

- Traveling
- Internet Surfing
- Reading Novels
- Listening songs

Experience:

☐ **Senior Software Engineer**

Builder AI

November 2023 – Present

- ☐ Worked closely with stakeholders to deliver critical feature enhancements and resolve high-priority bugs.
- ☐ Spearheaded third-party integrations with diverse storage providers.
- ☐ Engineered complex business rules to align with operational needs.
- ☐ Guided an offshore team for timely project delivery.

☐ **Ruby on Rails Developer**

NextPoint

May 2023 – October 2023

- ☐ Enhanced product functionality and optimized backend logic.
- ☐ Automated repetitive processes with business rules.
- ☐ Collaborated with Front-End Developers for API design.

☐ **Ruby on Rails Consultant**

Capgemini

April 2022 – April 2023

- ☐ Developed and deployed robust backend features.
- ☐ Designed scalable APIs and defined business rules.
- ☐ Conducted code reviews and mentored junior developers.

☐ **Ruby on Rails Consultant**

Nityo Infotech

May 2021 – April 2022

- ☐ Built dynamic landing page platforms.
- ☐ Mentored team members and coordinated onshore/offshore efforts.

☐ **Senior Solution Engineer**

Gammastack

June 2020 – April 2021

- ☐ Designed landing page platforms and collaborated globally.
- ☐ Maintained testing and optimization of system components.

☐ **Ruby on Rails Developer**

Cyber Infrastructure

June 2016 – June 2020

- ☐ Built user-centric applications and optimized performance.
- ☐ Developed scalable architectures and collaborated with UX experts.

Experience:

☐ **Senior Software Engineer**

Builder AI

November 2023 – Present

- ☐ Worked closely with stakeholders to deliver critical feature enhancements and resolve high-priority bugs.
- ☐ Spearheaded third-party integrations with diverse storage providers, ensuring seamless functionality.
- ☐ Engineered complex business rules to align with organizational goals and operational needs.
- ☐ Facilitated communication between Product Management and development teams to refine product scope and schedules.
- ☐ Introduced innovative architectural solutions to improve system maintainability and scalability.
- ☐ Guided an offshore team, ensuring project alignment and timely delivery.

☐ **Ruby on Rails Developer**

NextPoint

May 2023 – October 2023

- ☐ Enhanced product functionality through iterative development and rigorous testing.
- ☐ Improved system efficiency by optimizing backend logic and integrating modern storage solutions.
- ☐ Automated repetitive processes by deploying well-defined business rules.
- ☐ Coordinated API design with Front-End Developers to streamline client-side functionality.
- ☐ Played a pivotal role in establishing and refining development best practices.
- ☐ Actively collaborated with offshore teams, ensuring alignment with business objectives.

☐ **Ruby on Rails Consultant**

Capgemini

April 2022 – April 2023

- ☐ Developed and deployed robust backend features for consumer-centric web applications.
- ☐ Designed scalable Ruby on Rails APIs to support high-traffic usage.
- ☐ Defined and implemented intricate business rules to enhance operational workflows.
- ☐ Partnered with Product Management to prioritize feature development and deployment timelines.
- ☐ Conducted code reviews to maintain high-quality standards and mentor junior developers.
- ☐ Coordinated with distributed teams to ensure cohesive development efforts.

☐ **Ruby on Rails Consultant**

Nityo Infotech

May 2021 – April 2022

- ☐ Built a dynamic landing page platform leveraging Ruby on Rails to support marketing initiatives.
- ☐ Architected complex workflows to handle business-specific requirements.
- ☐ Ensured adherence to best practices in code structure and database design.
- ☐ Mentored team members in modern development techniques and tools.
- ☐ Oversaw collaboration between onshore and offshore teams, optimizing project outcomes.

☐ **Senior Solution Engineer**

Gammastack

June 2020 – April 2021

- ☐ Delivered high-quality consumer-facing features utilizing Ruby on Rails and advanced front-end technologies.
- ☐ Designed a robust landing page platform to improve user engagement.
- ☐ Conducted detailed analysis to deploy rules enhancing business decision-making.
- ☐ Established streamlined processes for collaborating with global teams.
- ☐ Maintained an active role in testing and optimizing system components for scalability.

□ Ruby on Rails Developer

Cyber Infrastructure

June 2016 – June 2020

- Built and maintained feature-rich applications using Ruby on Rails, focusing on user-centric designs.
- Collaborated with UX experts to ensure the delivery of intuitive user interfaces.
- Optimized backend processes for high performance in data-intensive environments.
- Actively engaged with product managers to align development efforts with business goals.
- Developed scalable architectures and maintained rigorous standards for team deliverables.
